Notification Regarding the Start of Testing Service for the Novel Coronavirus (SARS-CoV-2) IgM/IgG Antibody

Dear customers

We would like to thank you for your continued support for us at all times. Regarding the novel coronavirus (SARS-CoV-2) IgM/IgG antibody tests, we are pleased to inform you that we have started accepting contract services for research testing (not covered by insurance). The testing was performed by using the test kit (for research use only) developed and marketed by our company. The test kit statistically shows the cut-off index (threshold) of the ELISA antibody titer in the PCR positive group and the negative control group (pre-pandemic), and the fluctuation behavior of the antibody titer at the time of infection by clinical joint research with domestic clinical institutions (paper under submission).

Sincerely your,
